## Massenergy equivalence

**May 3rd, 2020 - This formula states that the equivalent energy E can be calculated as the mass m multiplied by the speed of light c  $3 \times 10^8$  m s squared Similarly anything having energy exhibits a corresponding mass m given by its energy E divided by the speed of light squared c <sup>2</sup> Because the speed of light is a large number in everyday units the formula implies that even an everyday object at'**
